Waru Naval Air Station (Figure 1) is situated 8 nm SSE of Surabaya and comprises one approximately 9,600 x 230 ft E/W asphalt runway, serviceable. Facilities comprise a parallel loop taxiway, 3 crossover links connecting the runway to the taxiway and 3 large parking aprons, a control tower and a POL storage area with 4 semiburied tanks. Portions of the crossover links and

the large parking area in front of the control tower are under construction. The support area at the SW edge of the airfield comprises numerous shops, barracks and administration buildings in various stages of construction. A probable asphalt batching plant is located on the north edge of the runway.

No aircraft were observed.
